Dear Boudewijn,

as the admin of the European Color Initiative I herewith grant you (having the former allowance from Olaf Druemmer, the chairman of the European Color Initiative) the license to put the ICC profiles contained in the package eci\_offset\_2009.zip and the ECI RGB working color space profiles into your distribution.

You do not have to pay any license fees to the European Color Initiative. The European Color Initiative does not guarantee that the ICC profiles meet whatsoever requirements - you will have to use and/or distribute them at your own risk. In no case will the European Color Initiative liable for any damage, loss of profit or any other direct, indirect or consequential damages that may result from using the ICC profiles, even if the European Color Initiative has been alerted about any issues with these ICC profiles. Also, the European Color Initiative does not provide any support, though we will be happy to learn about any issues you may run into.

VERY IMPORTANT: The ICC profiles must only be included without any modifications to them and MUST BE ACCOMPANIED by a license text from Heidelberger Druckmaschinen - please see the attached PDF that contains this license text (the reason for this requirement is that the profile have been built using Heidelberg's PrintOpen). Also, the source of the profiles must be indicated in an adequate way, for example by including a copyright notice in an appropriate place (like "Copyright by European Color Initiative, [www.eci.org](http://www.eci.org)").

Please do not hesitate to contact me with any further questions you may have.

Heidelberg License 3.pdf

best regards / mit freundlichen Gru:ssen
